

How to add DemoPro controls to a StreamDeck

If you haven't done it already, download the DemoPro Icons for StreamDeck from the FAQ on <https://www.demoproapp.com/faq.html#streamdeck>

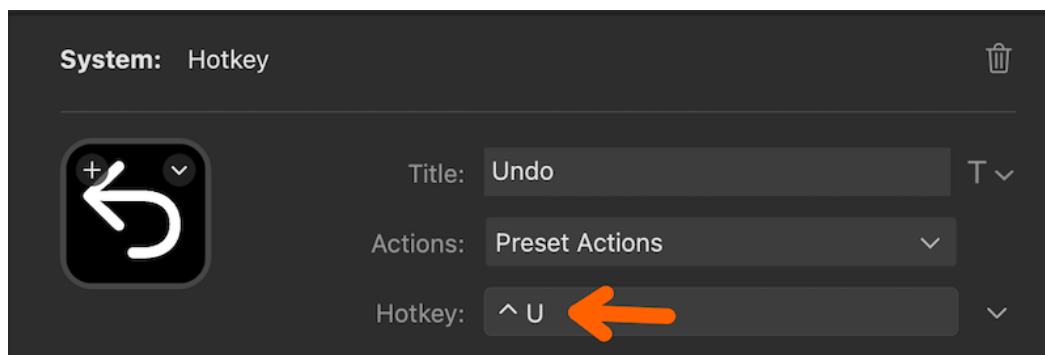

- 1 - On the DemoPro menu, select activation mode "Toggle"
- 2 - Go to the Stream Deck App / "Configure StreamDeck" from the menubar
- 3 - Click a key that you want to configure
- 4 - Drag "Hotkey" from the list of actions and place it on the key you want to map

- 5 - Drag and drop the icon you want to use, or click the chevron and select "Set from File"

6 - Assign the Hotkey to match what you have on the DemoPro menu

Repeat steps 3 to 6 for each key that you want to assign
